Wiss Offers Comprehensive, Cost-effective Services For All Your Needs

Specializing in medical and dental group practices for more than two decades, WISS has been at the forefront of many significant changes in healthcare. We have guided our clients through the complex issues of managed care, government regulation and intervention, and the business of practice management.

WISS professionals have an in-depth understanding of the healthcare regulatory environment and are intimately familiar with the operational aspects of running a group practice. We understand that the financial success of a practice is no longer solely dependent upon the skills of the medical or dental professional. WISS experts have helped clients track revenue, improve cash flow, and enhance profitability—all while allowing doctors more time to devote to their patients.

Accounting and Auditing Services

WISS professionals stay current with the ever-changing regulatory environment to ensure the financial compliance of your organization. Using process-oriented technology, we are able to spend more time examining what the numbers reveal. The knowledge we gain lends insight to facilitate informed business decisions.

Tax Services

WISS tax services combine rigorous and forward looking planning procedures with detailed knowledge of tax law to ensure accurate compliance with federal and state tax reporting regulations. In addition to representing clients before federal and state taxing authorities, we prepare tax returns and guide clients with year-round tax advice. We continually monitor changes in tax law in order to advise our clients as to the impact and proper tax compliance.
